

# Graphing Calculator

If you do not have a TI-83 or TI-84 Graphing calculator, please download one of the calculator emulators below that is appropriate for your computer.

## Windows Graphing Calculator Download:

1. [CLICK HERE](#) to download Wabbitemu.
2. Right click on the file to extract the zip file.  
Extract all files to your desktop to a new folder.
3. Open the new folder and double click the Wabbitemu application.
4. Choose to "Browse for ROM Selection".
5. Choose the TI\_84\_Plus\_ROM from the Wabbitemu folder.
6. When the calculator screen opens, choose the "View" menu, and choose "Enable Skin". This will make the calculator appear.
7. Press the "ON" button (lower left-side of the calculator) **to start the calculator**. You must use the mouse to press the buttons on the calculator or it will not function correctly.

View the instructions [here](#).

## Mac Graphing Calculator Download

1. [CLICK HERE](#) to download Wabbitemu.
2. Extract the files to a folder on your desktop or other convenient location.
3. Open Wabbitemu.
4. You will be prompted to open a file. Locate the file TI\_84\_Plus\_ROM.rom in the folder that you created and the calculator will open. Press the "ON" button to start the calculator. You must use the mouse to press the buttons on the calculator or it will not function correctly.

View the instructions [here](#).

\*An Android version of Wabbitemu is also available from the Google Play Store if you have an Android Smart Phone.

\*If you are having difficulty running Wabbitemu, VTI is another option, which may be downloaded here: <http://videomathteacher.com/free-resources/free-downloadable-math-calculators/download-free-virtual-ti-calculator-online/>

Be sure you to ask your teacher about additional calculator options if you are having difficulty running the calculator.
